PURPOSE-BUILT MATERIAL HANDLERS FOR

ARBORICULTURE

TREE CARE SERVICES

LAND CLEARING

ROADSIDE/EMBANKMENT
MAINTENANCE

RIGHT-OF-WAY CLEARANCE

Powerful Solutions for Arborists

SENNEBOGEN is changing the landscape for tree care specialists with innovative technologies applied to the industry's largest and most productive material handling machines.

A long, robust boom equipped with dedicated hydraulics for powerful job-specific attachments can take on the heaviest tree handling tasks. Experienced arborists say SENNEBOGEN tree care handlers can achieve up to 10 times the production of traditional climbing and ground-crew methods. SENNEBOGEN's popular Maxcab provides a comfortable, user-friendly environment to work long shifts safely without fatigue.

Tree Care Services

- Elevating, tilting Maxcab give arborists a direct view into the workzone from a safe distance
- Rotating sawhead with responsive boom controls complement traditional arborist skills to ensure quick, precise cutting and handling of limbs, with no freefall to the ground
- One system, one operator to dismantle, trim & cut to size, stack logs, load to trucks or feed processing equipment

Land Clearing

- Hydraulic sawhead to dismantle trees up to 125' tall, hold and cut limbs up to 48" diameter
- Powerful and efficient cutting and stacking for high production and fast cycle times
- Increased jobsite safety with no climbing and no ground crew required

Roadside Maintenance

- Interchangeable attachments for cutting, mowing and loading
- Long reach for safe operation across culverts and down embankments

Right-of-Way Clearance

- Excellent off-road mobility, speed and stability
- One piece of equipment to cut trees, clear brush and stack material
- Square footprint with centered swing gear maintains sure footing for cutting and lifting on rough terrain

Built-to-order models configured for your application

	718 M Rubber Tired	718 R-HD Crawler Tracks	728 M Rubber Tired	728 R-HD Crawler Tracks	738 M Rubber Tired	738 R-HD Crawler Tracks
Net power	160 HP (119 kW)	160 HP (119 kW)	173 HP (129 kW)	173 HP (129 kW)	225 HP (168 kW)	225 HP (168 kW)
Operating weight	47,180 lb (21,400 kg)	62,000 lb (28,100 kg)	65,000 lb (29,000 kg)	90,390 lb (41,000 kg)	95,700 lb (43,400 kg)	101,413 lb (46,000 kg)

Purpose-built from the ground up

SENNEBOGEN is the industry's preferred choice for:

Safety

Our "safety first" engineering leads the industry with factory-standard features including compact swing radius, sliding door entry, permanent catwalks, bulletproof glass, optional guarding, dual safety cameras plus clear 360° views of the complete workzone and into holds.

Production

Built to move more material faster at less cost, SENNEBOGEN leads the new generation in material handling equipment for smooth, precise handling, fast cycle times and efficient throughput.

Flexibility

Working with our application specialists, our modular engineering and manufacturing allow us to meet your application needs with machines built-to-order according to your choice of boom and stick configurations, undercarriages and mounts, diesel and/or electric power and custom features for specialized applications.

Operating Cost

Innovations in fuel savings and power options, long-life engineering and low-cost off-the-shelf service parts combine to meet the most rigorous environmental standards while cutting operational costs and downtime.

Simplicity

Our focus on simple structural and hydraulic design, without "black box" electronics, ensures maximum uptime and easy care for operators and technicians.

Service & Support

America's most complete inventory of material handler service components backed by the nation's largest network of factory-trained technicians ensures ready access to the parts and skills you need to sustain 24/7 operations.

For more details on your purpose-built material handler, contact your SENNEBOGEN dealer.

America's headquarters for material handler service and support

SENNEBOGEN LLC, based in Stanley, NC, was established in 2000 to support dealers and customers throughout the Americas.

PURPOSE-BUILT FROM THE GROUND UP

OUR FACILITY

Our 100,000 sq. ft. head office houses America's largest inventory of material handler parts and components along with our state-of-the-art Training Center and application support offices.

TRAINING CENTER

Offering hands-on instruction to dealers and customers at no cost, the SENNEBOGEN Training Center has graduated more than 1,000 technicians in specialized maintenance and troubleshooting procedures.

PARTS WAREHOUSE

From service parts and "uptime kits" to complete boom assemblies, our warehouse maintains a 98.6% fill rate for every SENNEBOGEN machine currently in service.
