

SENEBOGEN®

PURPOSE-BUILT MATERIAL HANDLERS FOR

DEMOLITION & DEBRIS HANDLING

TEARDOWN PROJECTS

METAL RECOVERY

SITE CLEAN-UP

Rugged Solutions For Demolition Contractors

Demolition work demands the ultimate in durability, safety and versatility.

SENNEBOGEN offers optional booms and attachments to take on the work of multiple machines with one compact footprint. Minimal electronics and maximum cooling efficiency are ideal for the challenging environment of a demolition site.

Operators appreciate the fine control of SENNEBOGEN hydraulics to perform precisely, quickly and powerfully.

Whether you are demolishing a facility, tearing down a building or engaged in metal recovery, SENNEBOGEN application specialists, engineering support and flexible manufacturing will help you go to work with the specialized system you need.

Teardown projects

- Boom configurations up to 182 ft. vertical reach available for precise attachment control in long-reach applications
- Elevating cab and 30° tilt provide optimal view for safe, efficient production
- Interchangeable hydraulic shears, hammers, grapples and buckets adapt quickly to varied demolition tasks
- Compact size and square footprint ensure stability and maneuverability on challenging urban jobsite terrain
- Demolition-duty safety cab includes windshield protection grill, bulletproof windshield and bulletproof skylight

Material recovery and site clean-up

- Efficient, mobile debris handling to consolidate piles, load trucks and feed processing equipment
- Magnets and mag-grab attachments quickly recover rebar and metals from debris before trucking
- Central swing point allows equal load lifting limits from all sides through 360°
- Compact transportable machines simplify equipment logistics and planning
- High-speed wheeled models move and maneuver quickly between multiple processing locations
- Telescopic tracked undercarriage for easy transportation

Purpose-built from the ground up

SENNEBOGEN is the industry's preferred choice for:

Safety

Our "safety first" engineering leads the industry with factory-standard features including compact swing radius, complete guarding packages, sliding door entry, dual safety cameras plus demolition-duty safety cab with windshield guard and bullet-proof glass.

Flexibility

Our modular engineering and manufacturing allow us to meet your application needs with machines built-to-order according to your choice of boom and stick configurations, undercarriages and mounts, diesel and/or electric power, and adaptability to multiple quick-change attachments.

Operating Cost

Innovations in fuel and power savings, long-life engineering and low-cost off-the-shelf service parts combine to meet the most rigorous environmental standards while cutting operational costs and downtime.

Service & Support

America's most complete inventory of material handler service components backed by the nation's largest network of factory-trained technicians ensures ready access to the parts and skills you need to sustain 24/7 operations.

Production

Built to move more material faster at less cost, SENNEBOGEN leads the new generation in material handling equipment for smooth, precise handling, fast cycle times and efficient production.

Simplicity

Our focus on simple structural and hydraulic design without "black box" electronics means more uptime with high resistance to jobsite dust and grit and with easy maintenance for operators and technicians.

Built-to-order models from 44,000 to 900,000 lbs.

Wheeled (M) and Tracked (R-HD) models

America's headquarters for material handler service and support

SENNEBOGEN LLC, based in Stanley, NC, was established in 2000 to support dealers and customers throughout the Americas.

PURPOSE-BUILT FROM THE GROUND UP

OUR FACILITY

Our 100,000 sq. ft. head office houses America's largest inventory of material handler parts and components along with our state-of-the-art Training Center and application support offices.

TRAINING CENTER

Offering hands-on instruction to dealers and customers at no cost, the SENNEBOGEN Training Center has graduated more than 1,000 technicians in specialized maintenance and troubleshooting procedures.

PARTS WAREHOUSE

From service parts and "uptime kits" to complete boom assemblies, our warehouse maintains a 98.6% fill rate for every SENNEBOGEN machine currently in service.
