

BREAK MORE MATERIAL, FASTER

- Engineered for fast cycle times under heavy loads
- High efficiency and fuel economy for lower operating costs
- Proven dependability in all scrap-handling and recycling environments
- Assured safety with high-rise visibility, 360° stability, secure access from ground to cab
- Ideal for breaking castings, slag and other materials

While a lot used to be done with rope-operated cranes, today modern material handlers are faster, more efficient and above all safer."

"We can break cast elements up to 15 tons with our drop balls, which requires not only skill, but also extremely robust and powerful machines. For twenty years, we have relied on the SENNEBOGEN material handlers."

Mark Schofield, President, Schofield Metal Recyclers
